

Roto Crape Fabric, the Versatile, Durable Material for Curtains, Chairs, Table Covers and Wall Coverings

RC fabrics from Anamika Fabs have a distinctive, unique and luxurious feel and texture. Also known as Roto crape, this fabric is woven from selected 330 Roto (HIM) S or Z twist 100% polyester yarn with strict control over warp and weft to ensure the right thread count that results in a perfect finish, strength, looks and drape of the fabric. Roto crape from Anamika is available in widths of 48 and 54 inches in weights ranging from 280 to 290 grams. We use quality dyed polyester yarn to produce over 30 shades and a variety of textures and grained finishes as well as patterns through our proprietary processes. From yarn selection and inspection to weaving to final processing and finishing, each yard of our RC crape undergoes strict quality control checks to ensure that each square inch is defect free.

At Anamika Fabs we use European high speed airjet/waterjet looms to weave these RC fabrics to international standards in terms of denier count, weight, finish, stretch, tear and abrasion resistance and other international parameters for crape fabrics in this class. Our sensuously luxurious Roto Crape has beautiful looks, wonderful textures and perfect drape making it ideal for use as chair covering, table covering, wall covering, curtains, purses, napkins and a variety of other creative, innovative applications, lending a touch of class and elegance. These fabrics will not pill or show up signs of wear on continuous heavy usage. RC fabric is easy to maintain, retaining freshness of colors and texture over prolonged use.
