

Sleek, Svelte, Advanced and Affordable HTC Desire 300

The HTC Desire 300 is a marvelous fusion of technology available at an affordable price. In looks it is sleek and a pleasure to hold, measuring only 131.78x66x10.12 mm and 120 grams in weight. The highpoint is its 4.3 inch high resolution WVGA display. Powered by a Qualcomm Snapdragon S4 dual core 1 GHz processor, the Desire 300 makes web browsing, watching videos, shooting pictures or playing games a breeze. Running on Android 4.2.2, HTC Blinkfeed home screen is a joy to operate and Sense UI 5 only makes it better on the 4.3 inch 16 M 480x800 pixel capacitive touchscreen display. The auditory experience is top class incorporating superior audio technology to give a studio like quality to music playback.

The Desire 300 takes a micro SIM and works on 2G/2.5G, GSM/GPRS/EDGE, 3G/3.5G UMTS/HSPA networks with strong signal strength. It has 512 MB RAM and 4 GB storage you can extend to 64 GB through a microSD card slot. The phone includes a proximity sensor, an ambient light sensor and an accelerometer. It has a 3.5 mm audio jack, micro USB, Bluetooth 4.0 and Wi-Fi for connectivity. The camera is a highlight, able to capture 5 MP at F2.8 aperture and 34 mm lens, giving pictures of stunning clarity even in low light. You can capture WVGA video and HD images. There is a lower res front camera for video chats. The 1650 mAh lithium polymer battery allows talk time of 11 hours on 3G with a standby time of 625 hours. Hurry, there is a deal going on this phone.

Slim, Powerful Huawei Ascend Mate, Full Value for Money

The first thing that strikes you about the Huawei Ascend Mate is its unusually large 6.1 inch screen. The second is its thickness. At 9.9 mm it is one of the slimmest large screen phones around. The Huawei Ascend Mate is 163.5mmx85.7mmx9.9mm and weighs 198 grams, making it easy to hold in your hand. The large 6.1 inch display is true HD, IPS, 1280x720 resolution touchscreen with Corning Gorilla glass cover. Display is flawless, powered by the 1.5 GHz quad core Hi-Silicon K3V2+ Intel XMM6260 processor running Android 4.1 and 2GB of RAM. Play games, browse your favorite sites or watch movies and the Ascend Mate works like a charm. There is 8 GB of onboard memory expandable through a microSD slot. The phone works on 2G and 3G bands with superior signal strength. It supports GPS and provides DLNA, Wi-Fi direct, Wi-Fi hotspot, Bluetooth 4, 3.5mm audio jack and USB connectivity. The Mate is equipped with gyro sensors for ease of use in any orientation. The awesome autofocus 8 MP rear camera captures stunning video and sharp, bright images even in low light. A 1 MP front camera is for video chats. The large screen is power hungry and Huawei have thoughtfully provided a 4050 mAh battery with 9 day standby time.

Though large in size, you can operate the Ascend Mate with one hand through the minimized keyboard and dial pad, conveniently designed for both left and right hand users. The Magic Touch is another feature in its favor, allowing use even when you are wearing gloves. The Mate gives the popular brands a good run for money and is worth grabbing with a deal going on.

Smartphones Redefined: New Nokia 1520

The new Nokia 1520 redefines smartphones, making other phones in the class go green with envy. The pride of place is undoubtedly occupied by its 20 MP pureview camera with Carl Zeiss optics capable of 1080 p HD video and multi-directional audio capture allied with Nokia Storyteller image editing tools. Audio capture rises to great heights with 4 microphones built into the phone for directional audio recordings and crystal clear clarity. Next is the superb 6 inch 1080p full HD IPS display with Corning Gorilla Glass and clear black display, visible even in bright outdoors. Running Windows 8, the new Nokia Lumia 1520 is an altogether refined experience, far above vanilla Android with features such as People Hub and Live Tiles that work like a charm.

A phone this awesome deserves a more than capable processor and Nokia have got it just right with Qualcomm Snapdragon 800 quadcore 2.2 GHz working in tandem with Adreno 330 graphics chipset and 2 GB RAM for flawless video playback, internet surfing, running apps and playing games. If that is not enough, the phone works effortlessly on 2G, 3G and 4G networks through a nano SIM, ready for the future. Measuring 162x85x8.7 mm, the phone weighs only 209 grams and is a joy to hold and use. You have the usual Bluetooth 4, NFC, microUSB, audio jack and Wi-Fi connectivity. The New Nokia 1520 is powered by a non-removable 3400 mAh battery with standby time of 768 hours and talk time of 27 hours 40 minutes on 2G, 25 hours on 3G and 124 hour for music playback. There is a deal going on and the New Nokia 1520 could be the new prized smartphone you will love to show off.

Nokia 106

Longest Life Battery on the New Nokia 106

The most outstanding feature of the new Nokia 106 is the 30 day standby time battery on a single charge. The Nokia 106 is a no-nonsense feature phone. The Nokia 106 takes a mini SIM and works only on 2G networks. It measures 112.9x47.5x14.9 mm and weighs 74.2 grams. The colorful display is TFT, displaying 65K colors in a 1.8 inch sized 128x160 pixels screen. There is no slot for external memory and the phonebook holds only 500 contacts. The internal memory is only 384 KB, abysmal by today's standards but more than enough for those who use the phone only to make and receive calls. It has no Bluetooth, no WLAN, no EDGE and no GPRS. Surprise! There is no camera. There is an FM radio though, to keep you entertained through internal speakers or a 3.5mm audio jack. A bare bones phone, the 106 has a digital clock, calculator, calendar, converter and expense manager.

The plus points of Nokia 106 are its long standby time and colorful red, white and black covers. The keyboard is also dust proof and splash proof for added reliability. Characters on the keys are embedded which means they will not be erased no matter how hard you use the phone. It is powered by an 800 mAh battery. Improved electronics offer long standby time and talk time of 9 hours. A deal is on and that could induce you to buy the Nokia 106, ideal for those who value simplicity and do not want the complications of a smartphone for making and receiving calls.
