MAGIC PLUS Growth Booster

MAGIC PLUS Growth Booster provides all essential nutrients and elements for the balanced growth of crops. It Stimulates flowering and the overall growth of crops. Provides Additional energy for better yield. Reduce the pre-dropping of flowers and fruits. It Stimulates chlorophyll synthesis as well as new tissue generation. It provides all essential nutrients like N, P, K, and secondary elements for the balanced growth of crops. Provides additional energy for better yield.

Composition:

Humic Acid12% w/v
Fulvic Acid.....06% w/v
Seaweed Extract14% w/v
Amino Acid8% w/v
Solvent.....Q.S.

HUMICA

Humic Acid (12%) and Fulvic Acid (6%) are organic plant deposits useful for developing white root, increasing water capacity in the soil, transferring nutrients from soil to crop root and stimulating the production of chlorophyll. It helps to improve plant roots and growth. Humi Plus is Used for all types of crops like Cotton, Chili, Banana, Mango, Brinjal, Rose, Sugarcane, Rice, Potato, Tomato, Onion, Papaya, etc.

Composition:

Humic Acid12% w/v
Fulvic Acid.....06% w/v
Liquid Potash.....03% w/v
Solvent.....Q.S.

Seaweed Extract

Seaweed has more than 70 minerals, vitamins and enzymes. Trace elements found in organic seaweed fertilizers include magnesium, potassium, zinc, iron and nitrogen all of which are beneficial to plants. Seaweed fertilizer increases nutrient and water uptake by providing strong root development of plants and encourages vegetative growth by accelerating the formation of chlorophyll.

Composition:

Seaweed Ex.....22% Mix
Micronutrients.....8%

CROP MAGIC

Crop Magic Promotes balanced growth of plants and increases bloom set and size of flowers & fruits. Improves seed germination and increases root growth development. Hence producing quality flowers and tasty fruits. Increases microorganisms in the soil that can invoke nitrogen from the air. Reduce salt content, breakthrough mineralized layer and effectively solve the soil salinization caused by over-fertilization.

Composition:

Seaweed Ex.....16%

Humic Acid 12%

Mix Micronutrients.....6%

AMINO POWER

Amino Power is a combination of Amino acid, Hydrolysed Protein and Vitamins. Amino acid is the natural building block of the protein synthesis. Amino Power Provides 14 Essential amino acid which required for the protein synthesis, Protein required for the fruit setting and new tissue development, induce flowering and reduce pre-dropping, improve fruit size and quality, improves nutrition uptake and their utilization. Amino Shakti Increase chlorophyll content in plants.

Composition:

Amino acid.....72%

Hydrolysed Protein.....8%

Vitamins.....6%.

Flower Booster

Flower Booster is a combination of Amino acid, Hydrolysed Protein and Vitamins. Amino acid is the natural building block of the protein synthesis. Flower Booster Provides 14 Essential amino acid which required for the protein synthesis, Protein required for the fruit setting and new tissue development, induce flowering and reduce pre-dropping, improve fruit size and quality, improves nutrition uptake and their utilization. Amino Shakti Increase chlorophyll content in plants.

Composition:

Amino acid.....40%

Hydrolysed Protein.....8%

Vitamins.....6%

POWER SHAKTI

Improve and Optimizes uptake of nutrients and water holding capacity. Stimulates plant growth with its organic and mineral substances. Helps to retain water-soluble inorganic fertilizer in the root zones. Enhance the uptake of nitrogen by plants. Increase white root development in crops. Reduces the availability of toxic substances in soil. Increase the Vitamin and mineral content of the plants.

Composition:

Humic Acid.....72%

K₂O14%

Fulvic Acid 12%

Organic Matter02%

CAL G ZYME

CAL-G Zyme is helpful for a decrease in fallen crops flowers & increase flowers quantity to long time crops like mango tree, chickoo, papaya, pomegranate, guava, coconut, banana, lemon, as well as all types of vegetables like garlic, chili, onion, as well as helpful in cotton crops. The use of this fertilizer production will increase and soil will become fruitful.

There is natural calcium in CAL-G Zyme fertilizer so the soil's hardness will reduce. The soil will become good and soft.

Very essential in vegetation's growth and best in natural elements is a pure wormy wash which is in CAL-G Zyme

Composition:

Seaweed Extract + Humic Acid + Fulvic Acid + Amino Acid + mix micronutrients
